

Environmental Policy

We are committed to operate in a responsible safe and reliable manner to promote a culture of safe environmental management. Accordingly, business activities will be planned and conducted to minimize and where possible, avoid adverse effects on the natural environment and social surroundings for the benefit of current and future generations.

We will ensure that every aspect of the environment will be taken into account when establishing, implementing and maintaining our Environmental Management System (EMS).

In implementing the EMS, we will promote a culture of responsible environmental management, protect the natural environment and social surroundings, preserve biodiversity, prevent pollution and minimize waste. We will comply with applicable environmental laws and aspire to higher standards within our business, and strive to continually improve our environmental performance.

Procedures described in the Integrated Management Manual have been introduced for the purpose of achieving the Company's Financial, Quality and Environmental Plans. Such procedures conform to the requirements of both ISO 9001:2015 and ISO 14001:2015, and represent the minimum standards adopted by our Company.

Environmental leadership, stewardship, and adherence to Braums Environmental Policy are the responsibility of all Braums employees and contractors, suppliers and vendors.

Andrew Bull
Managing Director
